

## Testimonials:

**WeldCanada.com**

I love the software! I am very happy with the CWB, for approval of CSA and AWS prequalified procedures, and ASME software and my customers seem to be as well. I updated some WPS's for one of my ASME customers' audit. The auditor from ASME thought your format was one of the best he had ever seen!

**Arnold Kamerman**, P. Eng.

*Amstel Engineering Inc.*

This is a fantastic service. I have been able to write many welding procedures in just the time it used to take me to do the research only. The greatest feature for me is being able to save my work online and then being able to go back to it later and edit it before I make the final save for our procedures book.

**Patrick McGlade**, Quality Manager

*American Fan Company*

Your welding software simplifies procedure writing for many of the welding codes, plus it's useful way of networking with members.

**Ed Craig**, Weld Process Control Engineer
